Meeting Notes:
- We will be using Census data alongside with data collected from the City of Revere to try and analyze any racial disparities in services provided by the CIty
- Look into the type of data collected by the Census and what datasets would be helpful for this project
- Look at potential papers or studies of other researchers that have worked on large scale analysis of city data
- Find the best starting point for this project, what data sets we want to pull or any mappings we want to create as a base for future deliverables
